EDUCATION

National Institute of Technology <i>Master of Technology in Computer Science and Engineering, CGPA-8.71</i>	Surathkal, Karnataka <i>Aug. 2025 – Present</i>
Aliah University <i>Bachelor of Technology in Computer Science and Engineering, CGPA-9.15</i>	Kolkata, West Bengal <i>Nov. 2020 – Jun. 2024</i>

PROJECTS

SyncTalentAI — AI Resume Intelligence Platform <i>Python, FastAPI, React, LangGraph</i> <i>Groq LLM, PostgreSQL, Redis, Firebase, WebSocket</i>	Mar. 2026 – Present
- Developed an LLM-powered platform addressing the gap between lack of structured resume feedback for students and inefficiencies in high-volume resume screening for recruiters. Student module — AI-driven resume domain classification and scoring with prioritized feedback; LangGraph-based pipeline for generating ATS-compliant single-page resumes; voice-enabled mock interviews with real-time evaluation and per-question reports. Recruiter module — bulk resume shortlisting using BM25-based keyword filtering followed by LLM-driven semantic scoring to generate ranked scorecards; automated generation of domain-specific interview questions and expected answers. - Engineered a real-time discussion feature using domain-specific topic channels with many-to-many WebSocket broadcasting, enabling seamless interaction between students and recruiters.	
FreeMind Agentic AI — AI-based Mental Health Support System <i>Python, RAG, LangChain, Pinecone, Agentic AI, Streamlit</i>	Dec. 2025 – Dec. 2025
- Designed to address mental health accessibility gaps for users unable to afford psychiatrists or uncomfortable seeking in-person support. - Developed an agentic AI system using the Gemini Chat Model for reasoning and stateful decision-making; leveraged Pinecone vector database for semantic retrieval and context-aware responses. - Integrated tools for psychiatrist discovery, appointment scheduling, and music therapy. - Deployed a Streamlit web application to manage secure counselling sessions.	
A Generative Approach for Creating Unique High-Resolution Garment Samples <i>Python, ReactJS, ExpressJS, Django, MongoDB, Selenium</i>	Aug 2023 – Jun 2024
- Engineered a Deep Convolutional Generative Adversarial Network (DCGAN) to produce distinctive men's shirt designs for individuals passionate about fashion yet unable to afford professional designers. - Implemented classification models to automatically identify and categorize garment features such as color, fabric, and style. - Built a full-stack web platform integrating Django and Express.js APIs with a React.js frontend for interactive user design visualization.	

TECHNICAL SKILLS

Languages: Python, C++, SQL
AI / Deep Learning: PyTorch, LangChain, LangGraph, RAG, Agentic AI
Web Development Frameworks: ReactJS, Node.js, ExpressJS, Django, FastAPI
Developer Tools: Jupyter, Kaggle, Colab, VS Code

LEADERSHIP & RESPONSIBILITIES

Career Development Center <i>Internship Coordinator</i>	NITK, India <i>Oct. 2025 – Present</i>
Collaborating closely with placement coordinators to streamline internship and placement processes.	

ACHIEVEMENTS

- Solved 700+ problems on **LeetCode**
- GATE 2025 - Rank 1916
- GATE 2024 - Rank 13242
- WBJEE - Rank 6833
