EDUCATION

National Institute of Technology <i>Master of Technology in Computer Science and Engineering, CGPA: 8.71</i>	Surathkal, Karnataka <i>Aug. 2025 – Present</i>
Aliah University <i>Bachelor of Technology in Computer Science and Engineering, CGPA: 9.15</i>	Kolkata, West Bengal <i>Nov. 2020 – Jun. 2024</i>

PROJECTS

SyncTalentAI — AI Resume Intelligence Platform <i>Python, LangGraph, FastAPI, React.js</i> <i>Groq LLM, WebSocket, Firebase, Redis, PostgreSQL</i>	Mar. 2026 – Present
- Developed an LLM powered platform addressing the gap between lack of structured resume feedback for students and inefficiencies in high volume resume screening for recruiters. Student module — AI driven resume domain classification and scoring with prioritized feedback. LangGraph based pipeline for generating ATS compliant single page resume, a voice enabled mock interviews session with real time evaluation including complete report. Also included platform to practice aptitude. Recruiter module — Bulk resume shortlisting using BM25 based keyword filtering followed by LLM driven semantic scoring to generate ranked scorecards, automated generation of resume specific interview questions and expected answers. Also included a platform to conduct LLM based aptitude exams. - Engineered a real time discussion feature using domain specific topic channels with many to many WebSocket broadcasting, enabling seamless interaction between students and recruiters.	

FreeMindAI — Agentic AI based Mental Health Support System <i>Python, RAG, LangChain, Agentic AI, Streamlit, Pinecone</i>	Dec. 2025 – Dec. 2025
- Designed to address mental health accessibility gaps for users unable to afford psychiatrists or uncomfortable seeking in person support. - Developed an agentic AI system using the Gemini Chat Model for reasoning and decision making; leveraged Pinecone vector database for semantic retrieval and context aware responses. - Integrated tools for nearby psychiatrist search, appointment scheduling, and music therapy. - A complete Medical Report generation in downloadable format detecting complexities and suggesting remedies. - Deployed a Streamlit web application to manage secure counselling sessions.	

A Generative Approach for Creating Unique High-Resolution Garment Samples <i>Python, Selenium, React.js, Express.js, Django, MongoDB</i>	Aug 2023 – Jun 2024
- Engineered a Deep Convolutional Generative Adversarial Network (DCGAN) to produce distinctive men's shirt designs for individuals passionate about fashion yet unable to afford professional designers. - Implemented classification models to automatically identify and categorize garment features such as sleeve, pattern, hemline, occasion with accuracy of 94.17%, 74.28%, 89.28% and 85.55% respectively. - Built a full stack web platform integrating Django and Express.js API endpoints with a React.js frontend for interactive user experience.	

TECHNICAL SKILLS

Languages: C++, Python, SQL
AI / Deep Learning: PyTorch, ANN, CNN, Transformer, LangChain, LangGraph, RAG, Agentic AI
Web Development Frameworks: React.js, Express.js, Node.js, Django, FastAPI
Developer Tools: Jupyter, Kaggle, Colab, VS Code

LEADERSHIP & RESPONSIBILITIES

Career Development Center <i>Placement Coordinator</i>	NITK, India <i>Jun. 2026 – Present</i>
Coordinating placement for batch 2026-2027.	
Career Development Center <i>Internship Coordinator</i>	NITK, India <i>Oct. 2025 – Jun. 2026</i>
Collaborated closely with placement coordinators to streamline internship and placement processes.	

ACHIEVEMENTS

- Solved 700+ coding problems on **LeetCode**
- Secured Rank 1916 in GATE 2025
- Secured Rank 13242 in GATE 2024
- Secured Rank 6833 in WBJEE
